Changelog: [CODE][MIUI 14]

Ready. Steady. Live.

[Highlights]

Improved system architecture comprehensively boosts the performance of both pre-installed and third-party apps while saving power.

Attention to detail redefines personalization and brings it to a new level.

More than 30 scenes now support end-to-end privacy with no data stored in the cloud and all actions performed locally on the device.

Family services allow sharing all the essential things with the people you care about most.

[System]

Stable MIUI based on Android 13

Updated Android Security Patch to April 2023. Increased system security.

[Basic experience]

Improved system architecture comprehensively boosts the performance of both pre-installed and third-party apps while saving power.

[Personalization]

Attention to detail redefines personalization and brings it to a new level.

Super icons will give your Home screen a new look. (Update Home screen and Themes to the latest version to be able to use Super icons.)

New widget formats allow more combinations, making your experience even more convenient.

Home screen folders will highlight the apps you need most making them just one tap away from you.

Want a plant or pet to always wait for you on your Home screen? MIUI has lots of them to offer now!

[Privacy protection]

More than 30 scenes now support end-to-end privacy with no data stored in the cloud and all actions performed locally on the device.

You can press and hold the text on a Gallery image to instantly recognize it now. 8 languages are supported.

[Family services]

Family services allow sharing all the essential things with the people you care about most.

Family services allow creating of groups with up to 8 members and offer various roles with different permissions.

You can share photo albums with your family group now. Everyone in the group will be able to view and upload new items.

Set your shared album as a screensaver on your TV and let all your family members enjoy these joyful memories together!

Family services allow sharing of health data (e.g. heart rate, blood oxygen, and sleep) with family members.

Child accounts offer a series of sophisticated measures of parental controls, from limiting screen time and restricting app usage to setting a secure area.

[Mi AI voice assistant]

Mi AI is no longer just a voice assistant. You can use it as a scanner, translator, call assistant, and more.

Mi AI allows you to perform complicated daily tasks by using simple voice commands. Communicating with your device could never be easier.

With Mi AI, you can scan and recognize anything – be it an unfamiliar plant or an important document.

Mi AI is ready to help whenever you bump into a language barrier. Smart translation tools support multiple languages.

Dealing with calls is so convenient with Mi AI: it can filter spam calls or easily take care of the calls for you.

[More features and improvements]

Your device can work with much more types of wireless card readers. You can open supported cars or swipe student IDs with your phone now.

Whenever you sign out of your account, you can choose to keep all your cards on the device without having to add them again next time.

You can boost connection speed using mobile data when the Wi-Fi signal is too weak.

Search in Settings is now more advanced. With search history and categories in results, everything looks much crisper now.
