DEAR ALL MIUI & NEXUS 7 II Fans

Please find the full procedure for the HOW TO DO IT in 30 minutes (if you are used with android devices and adb commands)

ALL is ok from side , i did 5 times the procedure to reflash from the stock rom in order to find the best , easy and secure way.

PREPARING NEXUS 7 II

1. in stock rom kitkat 4.42
2. enable USB debuger mode in the dev menu of nexus 7
3. drag and drop the miui ROM on the Root , last version it is a ZIP file , don"t uncompress it ! => http://en.miui.com/thread-16879-1-1.html

PREPARING THE PACK to UNLOCK BOOTLOADER

1. dload from google the 4.42 Stock Rom
   pack => https://developers.google.com/android/nexus/images#razorkrt16s
2. this Pack , in order to get the last ADB package + the last ROM for the nexus 7 II : it is must in case you get the bootloop
   the one from this site is not the last package
   copy it in the root of you HD, and rename it fastboot for example c:\fastboot\
3. open msdos cmd (in admin if win7/8), goto to this folder
4. Switch NEXUS 7 II , and enter in FAST BOOT MODE
   volume DOWN + ON = 3/5 sec
   stay in this menu
5. to unlock the bootloader see the guide , section unlock bootloader
   = http://en.miui.com/thread-15610-1-1.html

FLASHING THE NEW RECOVERY : TWRP 2.7.0.0

1. stay in fastboot menu + usb pluged of course (for win 8.1 64b must use the last google usb drivers)
2. dload the img TWRP 2700flo.img , this is the last version for nexus 7 II
   => http://www.teamw.in/project/twrp2/193
   copy it in the fastboot folder and rename it twrp.img
3. in msdos cmd (admin if win7/8), goto stock rom folder again
4. and type adb fastboot flash recovery twrp.img
   + enter , in 2sec the new recovery is flashed
5. Now , in the NEXUS , press UP and DOWN until to get the TOP TEXT displaying : RECOVERY and press power on in order to go in recovery mode
   Google logo will appear and after the TWRP logo team

FLASHING THE FAMOUS MIUI ROM

1. No need anymore to use the Fastboot folder
2. We gonna flash the Rom from the TRWP Recovery from now
3. Clic INSTALL , select the folder SDCARD and will find the Miui rom, previously installed from windows
4. Swipe to perfom the flash (zip signature disabled)
5. Wait 2/3 minutes : must display : Successfull (if not we need to make some extra settings in trwp : format DATA folder + wipe « cache folder » in advance mode only)
6. Clic Wipe CACHE/DALVIK and swipe to wipe
7. Press back , Home , and go to WIPE MENU and SWIPE AGAIN for FACTORY RESET, and back, back
   >> Warning do this 2 steps imperatively in this order !
8. Clic on Reboot and select POWER OFF (and no install SuperSU no need for Miui)

LOADING the NEW ROM

1. Switch ON the Nexus
   Google logo and ….. after 10sec the XIAOMI LOGO will appear
   wait application optimisation process

Release 15th MARCH 2014
