translation error for italian language i found:
Notification of chrome download in act: seconds and minutes are still in english
while remaining is OK ("rimanenti").

This update was terrible. Google play services crashes constantly. Unable to use
my mi4i at all... have t orevert back to prev. version

update to 5.9.18...

right after posting I got the update notification on the Mi, well, let's see how that goes

Still the question remains where to get the MIUI V6 stable ROM....

When updating the ROM, what is the best procedure to save you having to re download all your apps from play store? It's my apps on my sd card. Thanks

Lot of thanks for your answer and your test. I have already test with English, with same results

I also print from chrome and this was perfectly working before.

The spooler apk seems to be miui rim included. But I clear cache and data

without solving this issue?
I have no idea on what to do

I just checked for you and print any internet site as PDF document works perfectly in MIUI7 too using Chrome browser. From which app did you try to print as PDF?

Which apk are you talking about? I never saw a PDF reader included in the original rom.

And for the spooler nobody has the same problems.

Perhaps you need to wipe your phone, do a clean install and not restore your settings.

Sorry but print spooler exist since miui5 and maybe 4.

You never see it because you didn't test to print. This apk is a system apk. here it is.
